

## Mini SharePoint SharePoint Calendar Web Part

Mini SharePoint Calendar Web Part allows you to view all your SharePoint events. It's compact but packed with all necessary data and can fit anywhere on your page. It is easy to go from specific event view into your working site. Dates in the Mini SharePoint Calendar are ticked off to show that there's some event scheduled. The ticks do not overload the calendar but allow visual representation of how busy the day is going to be. To display scheduled events just hover over a marked date.

### Additional features:

- Displays data from any SharePoint list or library
- Customizable size
- Customizable color scheme
- Cross-browser support
