PayPal Web Parts for SharePoint 2007

PayPal Web Part settings

Use testing environment (PayPal Sandbox)

PayPal account:

Name of the item:

Price of the item:

The currency of the payment:

Default quantity:

Url of the button image:

Text of the button:

Successful payment return url:

Cancel payment return url:

On clicking either of the buttons, users are redirected to the PayPal page for completing the payment process, after which they return to the e-commerce web site via the URLs specified for successful or failed payments.

The buttons can be customized by changing the button image URL and/or the button text via the Settings menu. Moreover, there is a PayPal Sandbox environment available for testing purposes.

The Web Parts are compatible with both MOSS 2007 and WSS 3.0.
